## 8. <u>Annual Operating and Maintenance Cost after Completion of the</u> <u>Project</u>

The Annual operating and maintenance cost after completion of the project will be borne by the concerned District Health Authority (DHA) as well as Primary and secondary healthcare Department, Lahore.

## 9. DEMAND AND SUPPLY ANALYSIS

Semi modern health facilities and scientific diagnostics are presently available in this Hospital. This initiative of revamping Hospital will cover all departments and components of healthcare including Medical, Surgical, psychiatric, Cardiac, ENT, Ophthalmic and Pediatrician components. Moreover, women health components i.e. Gynecology and obstetric will also be emphasized upon. In emergency, calamities and natural disasters, valuable lives will be saved through revamping of Emergency Units.

Balance funds may be provided for completion of the project in subsequent years through ADP

#### **10.4 WEIGHT COST OF CAPITAL INFORMATION**

undefined

#### **11. PROJECT BENEFITS AND ANALYSIS**

#### **11.1 PROJECT BENEFIT ANALYSIS INFORMATION**

11.3 Social Benefits with Indicators

Social economic burden will be decreased due to availability of better medical services in the district. Time and money of community will be saved which were expended in other cities like Lahore Islamabad etc. on treatment of patients and for boarding and logging of attendants. The social status of community will rise.

11.3.1 Social Impact:

A number of patients lose their lives or suffer serious disabilities for want of timely access to the health facilities. The project will ensure that no one is left to reach the health facilities. The most important beneficiaries will be mothers having complicated delivery conditions. The number of patients transferred to the health facilities for treatment and lifesaving will serve as indicators for performance evaluation. In long term the project will help in improving socio-economic indicators of IMR and MMR.

#### **11.2 ENVIRONMENTAL IMPACT ANALYSIS**

**Environmental Impact** 

It will have no hazardous effect on the environment. On the other hand, addition of horticulture and landscaping will provide healthy environment to the general public. All the more, the program is environment friendly having no adverse environmental effects. Simultaneously, this shall further improve environment by creating sense of responsibility among employed and beneficiaries of the service

## **11.3 PACT ANALYSIS**

undefined

#### **11.4 ECONOMIC ANALYSIS**

**Employment Generation (Director and Indirect)** 

Revamping of this Hospital will lead to generation of employment for highly skilled /professional staff and unskilled staff leading to reduction of unemployment. Huge employments opportunity will be created from the establishment of the project. The Medical doctors and paramedics who are trained in this discipline or intended to specialize in this field can make maximum use of training. A large number of gazette and non-gazette posts will be available for employment directly or indirectly.

11.6 Impact of Delays on Project Cost and Viability

Delay in the implementation of the project will lead to increase in cost and increase financial burden on the Government and general population of Punjab. Since the project is one of the major needs and a long awaited desire of the community, therefore, Government of the Punjab contemplated plan for early execution of Revamping of Emergency Units. The delay will not only deprive the patients of the state of the art facility but also distort the public image of the Government.

#### **11.5 FINANCIAL ANALYSIS**

Financial Benefits & Analysis

Tremendous public benefits will be accrued from revamping of Emergency Units:

| The Targets of Sustainable Development Goals (SDGs) will be achieved |
|----------------------------------------------------------------------|
| The Human Development Index of Pakistan (HDI) will improve           |
| Infant Mortality Rate will decrease                                  |
| Mother Mortality rate will be decreased                              |
| The international commitments of Pakistan will be accomplished       |
| Health standard of public will                                       |
| Better Health Facilities to mother and                               |
| Prompt and scientific facility for operation                         |
| Rehabilitation of disables and injured                               |
| Blindness in this area will be decreased and controlled              |
| Better social and mental health to addict                            |
| Provision of better health facilities at doorsteps                   |
| Awareness and control for communicable                               |
| Survival of heart failure                                            |
| Social indicators of Pakistan will improve                           |
|                                                                      |

This will decrease load of patients on teaching hospitals and specialized institutions by promoting physical and mental health. By adopting preventive and Hygienic principles, the number of patients and diseases will decrease. Resultantly budget load of Government for treatment will decrease and saving will be utilized for development programs.

11.1.1 Financial Impact:

In the beginning, It is extremely difficult to put a money value on each life saved by taking/shifting a critically ill patient to the appropriate health facility for treatment. However, the exact amount spent shall be calculated against each patient shifted by analyzing data collected during operations.

11.2 Revenue Generation

Revenue will be generated from:

Indoor fee Laboratory fees Diagnostic facility fees Dental fee ECG fee Private room charges Ambulance charges From other fees prescribed by Government

#### **12. IMPLEMENTATION SCHEDULE**

#### **12.1 IMPLEMENTATION SCHEDULE/GANTT CHART**

From September, 2017 to June, 2019

#### 12.2 RESULT BASED MONITORING (RBM) INDICATORS

undefined

#### **12.3 IMPLEMENTATION PLAN**

Original Gestation period (From September, 2017 to June, 2019)

Extension in Gestation period for one year with no change in cost & Scope till June 2020.

1st Revised gestation period till June, 2021

2nd Revised gestation period till June, 2023.

3rd Revised gestation period till June, 2025
